

HYATT REGENCY ROOF REPLACEMENT

PERTH, WA

SPECIALIST ACCESS - SAFETY NET INSTALLATION

PROJECT

Hyatt Regency Perth Roof Replacement

CLIENT

NovaPlas

DURATEC CONTACT

Jonas De Prose 0421 395 171

DESCRIPTION

Debris and tension netting systems were installed in the barrel vault and space frame roofs at the Hyatt Hotel during the roof replacement.

The tension netting was engineered and manufactured locally. The systems enabled workers to safely access the inside of the roof panels whilst connected to static line systems.

HIGHLIGHTS

- ▶ All work was completed over a working lounge bar without interruption.

IMAGES (FROM TOP TO BOTTOM)

- ▶ Rope access installation of a tension netting system.
- ▶ Debris netting installation to arrest dust during a roof replacement project.
- ▶ Dropped object protection.
